

DOUBLE BOILED LINSEED OIL AND MINERAL SPIRITS FIELD SECTION 2013

2013.1 To establish procedures for inspecting and sampling double boiled linseed oil, Type II; and mineral spirits for surface sealing of bridge decks and other concrete structures as required. The requirements are set forth in separate bid requests issued by the Department.

2013.2 Apparatus. Sample containers shall be one quart [1 liter], screw top cans which are clean, dry, and free of all contaminants.

2013.3 Procedure

2013.3.1 Inspection. The inspector shall make certain that the drums are of the proper type and are filled in accordance with the requirements of the bid request.

2013.3.2 Sampling. A one quart [1 liter] sample, representative of each lot or shipment of double boiled linseed oil, Type II, and/or a one quart [1 liter] sample representative of each lot or shipment of mineral spirits shall be submitted to the Laboratory. Identification Form T-617 shall accompany each sample submitted to the Laboratory and should include all pertinent information, such as: manufacturer's name and address, supplier's name and address, quantity represented in gallons [liters], purchase order number, inspector's name, and inspector's identification number.
